Child Labor

In Canada, and in the western provinces particularly, as in many other agricultural countries, laws are enacted and regulations made under these laws from the operation of which the industry of agriculture and those engaged in it are exempted. For example, legislation regarding hours of labor in industry cannot well be made applicable to agriculture, although there are some idealists who, shutting their eyes to practical conditions, urge that such laws could and should be applied and enforced on the farms as well as in the factories. Workmen's Compensation Acts passed for the protection of urban workers, are in many respects not applicable through out the rural sections.

As we proceed to write this article, daily newspapers lie on the desk telling of the complete wreckage of the N.R.A. codes governing industry and business generally throughout the United States as a result of a decision of the Supreme Court declaring such legislation unconstitutional, being beyond the powers of Congress to enact inasmuch as it encroaches upon and usurps the constitutional rights and powers of the individual States of the Union.

Whatever varying and opposing opinions people may entertain regarding the Roosevelt experiment as a whole, there has been general approval of the provisions in the N.R.A. codes prohibiting child labor in shops and factories. It has been estimated that an army of at least 100,000 children marched out of shops and factories with the establishment of these codes, and there was a widespread belief that thereby the increasing problem of child labor had been solved for the time being at least. Now the protection afforded these children has been destroyed, although it may be hoped that those in control of industry will not revert to the employment of child labor.

Unfortunately, industry accounted for only a small proportion of the 700,000 children under 16 who were later as working at the time the U.S. census of 1920 was taken. By far the greatest number, almost half a million, were found in the ranks of agriculture, to which the codes did not apply. It has been pointed out that the cotton fields, tobacco fields, truck gardens, beet fields, onion fields, potato fields, cranberry bays, berry farms, hop fields and orchards, with such returning seasons make their demands upon the nation's children, and that to hundreds of thousands of boys and girls, many as young as six, the coming of the end of school seasons meant not the beginning of a holiday time of freedom and play but a period of toil that often starts at sunrise and ends at sundown.

Except for the fact that these children work in the open air, their lot is in many respects a harder one than those children in shops and factories and one can appreciate the yearning expressed by a 12-year-old boy for the day when he will be old enough to get a job in a mill and work only eight hours a day.

The situation in Canada is, of course, not comparable to that in the United States, or in other lands where congested populations eke out an existence and intensive tillage of the land by the whole family is necessary. Furthermore, in Canada our standard of living and of education is much higher than in most countries, and in the north, Indians and other Indians of the southern States. Canadian parents, as a rule, are more desirous of giving their children the highest possible education than they are to work them as farm hands and profit-making laborers.

But inasmuch as many of our laws which are designed to protect urban workers and which prohibit child labor are not applicable to agriculture, a greater responsibility is thrown upon parents engaged in agriculture to protect their children and not lose sight of the humanities, the frailties, the limited powers of endurance of young boys and girls, and to remember that their proper physical development and mental outlook on life necessitate hours of play and recreation; that their bodies and minds will be stunted by long hours of work and no play. It is still true that all work and no play makes Jack a dull boy.

This is not to say that farm boys and girls should not be required to assist in the work of the farm, they should. Doing chores is to be rewarded with education and preparation for life, and it would be both foolish and wrong to do for them what they should do for themselves, or permit the development of habits of idleness or shirking of the duties that are the basis of their protection from what may be termed exploitation by the standards of rural as in urban life, it is all the more necessary that rural people guard against selfishness and thoughtlessness on their own part in the matter of overworking children on the farm.

Canada stands high in the matter of child labor. It is a matter of national pride that this is so. We stand high in the matter of education and our school attendance laws afford the greatest legal protection against the exploitation of child labor in city and country. It should be the aim of the Canadian people as individual citizens to raise the standard of child life progressively higher as the years go by, and entirely eliminate the blot of commercialized child labor from this fair Dominion.

Belgium is the most densely populated country in the world, having nearly 8,000,000 residents occupying an area of 11,702 square miles.

NATURE'S MINERAL SALTS

Change the system—purify the blood—relieve the bowels—strengthen the nerves—improve the complexion—these are the benefits of SASKASAL.

SASKASAL

If you want to be popular it's a good idea to learn the art of remembering what to forget.

Live "Dragons" At Zoo

Habitants Of Dutch East Indies Taken To London

There were live dragons in King George's Silver Jubilee celebrations, but they did not take part in the procession.

There was a pair of them and they were seen for the first time by the public at the zoo. Komodo dragon is their full name, though learned people speak of them as monitor lizards. They came from Komodo Island in the Dutch East Indies, where they were brought by Lord Moynie, who has been there studying their habits in the wild state. Some of the animals in their native habitat are 12 feet long, and their nearly-related, extinct Australian species grew to 50 feet. And these it is that are supposed to have been the originals of the dragon legends throughout the world.

Seen travelling erect on their four legs and crawling like the alligator with their long heads carried aloft and the tips of their long tails sweeping the earth, they are indeed capable of inspiring fright in the primitive mind.

The pair given to the zoo are the most interesting and valuable specimens in the wonderful collection and some striking photographs of them in their native surroundings accompany the exhibit. They were kept in the zoo for a few days so that the keepers might study their habits, and were then put on view for the first time on the King's Jubilee Day.

A Magnificent Statue

Unveiling Revealed Efficacy Of Black Prince Is Pure Gold

The Black Prince, or at least his statue is no longer black.

For centuries the statue over his tomb in Canterbury Cathedral has been as black as his name. It was never cleaned.

For about a month ago, it was centuries of grime and a coating of protective enamel were delicately removed under the direction of Professor W. W. Tristram.

A most beautifully wrought effigy in pure gold on a foundation of bronze was revealed. It is in almost perfect preservation and is one of the most wonderful examples of fourteenth-century craftsmanship in existence. The tomb was built 550 years ago.

"The most magnificent tomb in England," is Professor Tristram's description. "We clean the cathedral regularly," the Dean of Canterbury said, "but for some reason, I really don't know why, it never occurred to anybody to clean the Black Prince. That we have done so everybody is delighted, and we are having a great many visitors. The tomb is one of the jewels that make up the crown of the world. Its value is incalculable."

Gasoline Discovered

Unable To Explain Gasoline Reservoir Near Earth's Surface

A huge underground lake of pure gasoline was discovered in the Colorado district near Wilmington, California, causing hundreds of persons to stampede to the scene.

Shallow wells, most of them dug to a depth of only two feet, were producing from four to six gallons of gasoline an hour.

The scene, a low area about two blocks square, was dotted with hundreds of gasoline "prospectors," some of whom brought hand pumps to speed up production. Motorists filled the tanks of their automobiles and trucks.

Fire Chief Ralph Scott, at a loss to account for the gas, theorized that beneath the earth's surface, as it were, however, it probably came from a leak many years ago in a pipe line leading from a refinery to a harbor terminal.

More Counterfeiting

Advances Made In Science Makes Danger More Threatening

The United States secret service officials declared the perfection of a photo engraving process has enabled the underworld to turn out counterfeit currency in a much more efficient manner.

Construction of the Canton-Hankow railway in China is progressing so rapidly that the line may be in operation this year.

ALL FOOD MADE HER ILL

Caused by Acidity—Corrected by Kruschen

"It is only fair to pass these facts on," writes a nurse. "I was suffering from over-acidity and flatulency to such an extent that I was completely ill. I couldn't take food. When I actually got myself taken some thing, I would be wretchedly ill. I have now taken Kruschen for 12 months, and I have no doubt that it has righted my digestive system. I am now quite fit and able to work with vigor again."—Nurse E. S. Indigestion is caused by a failure in the healthy flow of the gastric digestive juices. As a result, your food, instead of being assimilated by your system simply collects and ferments inside you, producing harmful acid poisons. The immediate effect of this is to promote the formation of gas and flatulence of the body. As you continue with the "little daily dose," it ensures the regular and complete elimination of all waste matter every day. And that means a complete end to indigestion.

A Remarkable Personality

British Empire Suffers Great Loss In The Death Of Col. Lawrence

The death of Col. T. E. Lawrence is to be mourned by the British Empire. Lawrence, since evidently he had changed his name by legal process of recent years, bore the British Empire one of the most colorful figures it has yielded. "Lawrence of Arabia" was more than colorful; he was almost a mythical god. There was even a suggestion of messianism in the strain about the man, so remarkable were his powers of leadership and influence.

Lawrence, only 46 at death, and a graduate of Oxford, unquestionably helped to the winning of the World War in its Eastern front. He it was who, by sheer personal influence, quelled friction among the Arabs and routed and marshaled them against the Turks. He helped materially toward Arabia's victories in Palestine. He was a strange combination of scholar, soldier, mystic and diplomat. He was a peculiar yet remarkably effective force, projecting into a romantic and difficult setting. Lawrence was as unobtrusive as he was effective. He was a poor publicity man so far as self was concerned. Unlike the Pharisees of an earlier day in the life of the East, he sought no greetings in the market place or chief seats in the temple and at feasts.—Regina Leader.

Lac Seul Project

Rising Of Water Causes Damage To C.N.R. Road Bed

Caused by the seepage of Lac Seul in northwestern Ontario has caused damage to the road bed of the Canadian National Railways. Hon. Hugh Stewart, minister of public works, explained a vote of \$175,000, for the public works bill for Lac Seul project, to the House of Commons, raised under an agreement between the Dominion and the provinces of Ontario and Manitoba in connection with power development.

The money will be used for rip-rapping along the railway and contributions to the cost of the work will be sought from both Ontario and Manitoba.

In Memory Of Livingstone

Statue Of Famous Explorer Erected In South Africa

A famous explorer's memory has been perpetuated by a memorial erected almost at the edge of the Devil's Cataract of the Victoria Falls in South Africa, where their bodies were to be buried. A spray of tumbling waters ever visible. The memorial is in the form of a statue of Dr. David Livingstone, who was unveiled by the Hon. H. T. Moffatt, a former Premier of Southern Rhodesia, and himself a nephew of the famous explorer and missionary. The memorial is the famous Scott and discoverer of the Falls has been provided by the Federation of Caledonia Societies of South Africa.

Economic Air Transport

Aerial Train Can Drop Gliders At Different Points

A Soviet aerial train took off in mail week from Moscow on an experimental flight and landed four and a half hours later at Kharkov about 400 miles away. It consisted of one regular aeroplane towed three gliders each manned by a pilot. The idea of such aerial trains for individual gliders can drop off at different points without the main aeroplane landing, thus providing swift economic air transport.

Russia Making Rubber

Oil Waste And Calcium Used In New Process

New processes for making synthetic rubber out of the waste products of oil refineries and from calcium chloride are being tried out in Russia.

Heads of the Soviet industrial agencies expect shortly to be manufacturing the product at the rate of 20,000 tons a year.

This will have far-reaching effects on the rubber-growing plantations of the Far East, and will upset considerably the working of the Rubber Restriction Scheme, under which 30 per cent. of the trees are not being tapped so as to force up raw rubber prices.

The first factory for manufacturing rubber from oil waste is now being started in Moscow. The lessons learned there will be applied in the construction of several large plants in the oil well districts. About 35 pounds of rubber are produced from the waste products obtained from refining a ton of oil. The past these products in many cases had to be wasted.

The other process, for manufacturing rubber from calcium carbide, is not so open to criticism. In Armenia, where a factory is now being constructed. The process is the invention of a number of young Soviet scientists working in Leningrad. Water is added to the calcium carbide, forming acetylene, the gas of which is often used for lighting. Then, after a series of chemical reactions, a substance called chloroprene is produced and thus ultimately becomes rubber.

The minister is said to have all the working and wearing qualities of real rubber, and to be very much cheaper.

Best Aid To Sleep

Formula For The Perfect Night-Cap Has Been Evolved

It is generally recognized that the best aid to sleep is warm milk; and that the main use of all night-caps is to keep the head warm, and of removing from hot milk the unpleasant taste which prevents so many people from drinking it regularly at night. Since tea is the cheapest beverage in the world, and the one that is in every family cupboard, its use in this connection is highly desirable. A formula for the perfect milk night-cap has now been evolved. Tea should be made in the usual way, which means that one teaspoonful of leaf should be allowed for each person and one for the pot. The pot should only be filled half way, and when pouring out after the usual four to five minutes infusion, the cups should be only half filled. They should then be filled up with hot milk, but not with boiled milk.

Twenty-two million cups of tea are drunk in Canada every day or over eight million cups of tea a year. That is a considerable figure, and the farmer's greatest allies, for investigation has shown that the number of people who drank tea without milk is almost negligible.

Welcome Heavy Rain

Australians Glad To See "Knock 'Em Down" Variety

Darwin, Northern Australia, recently welcomed the annual "knock 'em down" rains.

Although this aboriginal description of the torrential downpours, which herald the end of the wet season, sounds grim, the rains are very welcome throughout the Northern Territory. These heavy downpours towards the end of the monsoon period, which last for a long time, earlier falls have caused to grow to a height of six to ten feet.

In the three months following Christmas about 40 inches of rain fell in Darwin, and the grass bordering the roads was so high that a man driving along the road could not see a friend walking along the footpath. In low-lying sections of the city grass grew in a tangled mass ten feet high. That is why "knock 'em down" rains are welcome.

A Great Saleman

The greatest salesman of the Empire is the Prince of Wales. On a hot day, once, according to Lord Dudley, he talked in Rio de Janeiro for more than an hour. As a result, British iron and steel industries received an order for a \$15,000,000 contract. Lord Dudley told the story at a meeting of the Iron and Steel Federation of which he is president.

A blind philanthropist has given \$200,000 for investigations in Scotland on the origin and causes of blindness, working towards prevention and cure.

'Tis Jolly To Be Wise!

There is a lot more pleasure in rolling a cigarette with Ogden's Fine Cut—a tobacco you KNOW will pass your own tests for smoothness, coolness and fragrance.

Smart "roll-your-owners" everywhere are "wise" to Ogden's. They'll tell you that Ogden's Fine Cut and "Chantrelle" or "Vogue" papers make the right combination for rolling smooth, satisfying cigarettes.

SAVE THE POKER HANDS

OGDEN'S FINE CUT

An Old Organization

First Holstein Society Started In Germany In 1872

Cattle resembling the present-day Holsteins have been bred for centuries along the south shore of the North Sea, from Holland over to Denmark. Some of the early importations into the United States came from the German province of Holstein, just south of Denmark and of breed society of that name was started in 1872. But most of the early importations came from Friesland and the country in Holland bordering on the Zuider Zee and the Holstein-Friesian Association of Canada was formed in 1891.

Although the most of the foundation stock of the breed came from Friesland the name has stuck, the Holstein-Friesian Association of Canada having been formed in 1891.

New Type Of Tent

Framework Of Airtight Cloth Tubes Has To Be Inflated

A pneumatic tent recently displayed in London must be pumped up. In place of the customary center pole and guy ropes, the shelter has a framework of airtight cloth tubes that may be blown up with an ordinary motor-car pump when the camping site is reached. When it is erected, the tent is six feet high and seven feet square. Deflated, it fits in a suitcase.

KIDNEY TROUBLE

will result in headaches, backaches, broken sleep, irritability, a tired, listless feeling during the day. After the inflammation of any of these symptoms, take GIN PILLS for prompt, safe relief. You'll feel better, look better and sleep sounder.

Remember the name GIN PILLS FOR THE KIDNEYS

Prairie Farm Rehabilitation Act Calls For The Demonstration Of Methods To Control Soil Drifting

Five township or district areas were being selected in the prairie provinces as a large scale demonstration of soil drifting control and soil production. "The conservation effort," Minister of Agriculture Robert Weir announced in discussing progress in the government's drought and soil drifting program. Work was being actively pushed ahead towards the study of these areas which might best represent large areas of similar drought conditions.

"In areas where drought has had most disastrous consequences and where soil drifting has compelled farmers to leave their lands," he stated, "special investigations will be conducted as to the best methods of reclaiming the soil, either for pasture purposes or a revised type of agriculture in which strip farming, the use of legumes, grasses and drought resistant cereals, the use of cover crops and cultural methods will allow development of a program of agriculture which will guarantee sustenance and reasonable security to the owner."

Most of the worst areas already had been inspected. One such area had been selected lately as a basis on which to start investigation work as to the best way and means of re-establishing grasses or crops. Several more such areas will be operated.

An initial program was practically completed, he continued, for putting into effect water development projects provided for under the Prairie Farm Rehabilitation Act. A staff of engineers engaged in this type of work would be appointed immediately "so prompt assistance may be given to those desiring to avail themselves under this act for development of surface and ground water supplies." Small water projects were being given immediate special attention.

Although it would take another year in order to make available adequate supplies of trees yet all the sources of the Royal Society of Canada. Back in 1899 the prairie farmers had a taste of dust storms—recent blows in the west. Dr. E. H. Oliver, of Saskatoon, one time moderator of the United Church, told members of the high protein content of Western Canadian wheat, which has made it valued in the markets of the world, is due to the climate that the soil, Frank T. Shurt, F.R.S., the year's winner of the Flavelle medal, declared to members of the physical science section. The content was due, he said, to the high temperatures and scanty rainfall usually prevailing in the prairie provinces in the late summer and autumn months.

Strange Street

Amazing Story of Toronto Man Who Gained Prominence in England. "Strange Street," the autobiography of A. Beverley Baxter, 44-year-old Torontonian who became editor-in-chief of the London Evening Standard, was prominently reviewed in London newspapers.

It relates the amazing story of the rise of the former assistant in a music shop in Toronto to a high post in Fleet street, a junior partner in the famous "Max Marmont" firm, and finally to a position as a \$50,000 a year publicity executive for a British film corporation.

"Strange Street" reveals Lord Beaverbrook's undying affection for Andrew Bonar Law, the "New Brunswick boy" whom he made prime minister of Great Britain.

Likes Winter Here Best

Governor-General's Son Does Not Want To Leave Canada.

Because he likes "the winter here best," Hon. George St. Lawrence Neufville Founley, four-year-old son of the Governor-General and Lady Neufville, does not want to leave his native Canada.

His mother related the story at the home of the Hon. Justice McRae after she had told the youngster they were leaving the Dominion.

A sharp reduction of 8 per cent in Canada in potato exports for 1935 is indicated, according to official estimates. This reduction would bring the 1935 level of potato exports to the 1933 level. The main reductions are in the provinces of Nova Scotia, New Brunswick, Prince Edward Island, Quebec and Ontario.

Beizol is a common source of severe poisoning to women in some industries, having a tendency to destroy the white blood cells and resulting in dangerous anemia.

It was estimated 148,000,000 pounds of dust fell yearly on greater Montreal, according to officials at McGill University.

Finished His Sleep

Lazy Passenger Delayed Three Liners For An Hour

All because one man would not get out of bed. Three great liners and more than 600 passengers were held up for an hour, and the whole of the landing service was disorganized at Tilbury Docks, England.

It was 7 a.m. when a big buff-colored ship from Australia put into the docks. In just over the hour medical and passport examinations had been concluded, and the passengers, with their baggage, had left the ship.

That is, all but one. He lay sleeping peacefully in his luxurious state-room cabin. Stewards informed him that the liner had been cleared, and was waiting to cast off from the landing stage. The reply was a deep breath.

Later he was again awakened and told that two other liners were waiting in mid-stream to come in and discharge. One was a liner from the Far East and another from Australia, wanting to know why they could not land. Behind this was a foreign ship with 200 passengers.

Sirens blew in vain. Friends waited on the landing stage. But the ships could not put in till the other had cast away.

At last the belated passenger did not leave the first vessel until two and a half hours after it had begun to dock.

Western Wheat Quality

High Protein Content Due To Climate

Over a broad field of specialized knowledge, touching on the scientific work, history, and agriculture of the Dominion, noted Canadian scholars discussed at McMaster University results of extensive research. It was the opening day in Hamilton for the meeting of the Royal Society of Canada.

Back in 1899 the prairie farmers had a taste of dust storms—recent blows in the west. Dr. E. H. Oliver, of Saskatoon, one time moderator of the United Church, told members of the high protein content of Western Canadian wheat, which has made it valued in the markets of the world, is due to the climate that the soil, Frank T. Shurt, F.R.S., the year's winner of the Flavelle medal, declared to members of the physical science section. The content was due, he said, to the high temperatures and scanty rainfall usually prevailing in the prairie provinces in the late summer and autumn months.

The content was due, he said, to the high temperatures and scanty rainfall usually prevailing in the prairie provinces in the late summer and autumn months.

Trans-Canada Highway

Lake Shore Route Is Endorsed By Lakeside Cities

Unanimous endorsement of the Lake Shore route from Port William and Port Arthur by Nipigon, Schreiber, White River to Sault Ste Marie as the Trans-Canada highway jointly was given by the Chambers of Commerce of the two lakeside cities at a special meeting.

In taking this action the two chambers renewed their affirmation of policy with regard to the unfinished section of the national road that added to various routes that were mooted.

Westerners Honored

Fellowships to enable students to continue research work at universities of the United States, Great Britain and Europe were awarded at the annual meeting in Hamilton of the Royal Society of Canada. The following were among those honored: James A. Gibson, University of British Columbia, history; Andrew McKellar, University of British Columbia, physics; Reginald Salt, University of Alberta, zoology.

Canada exported to all parts of the world during the month of March, 1935, farm machinery and implements to the value of \$4,132,199. Included in the exports were 1,869 down spades, shovels and parts; 3,933 disk harrows and parts; 3,434 plows; 1,220 cultivators; 120 harrowers and binders; 216 mowing machines; and 81 hay rakes. The value of these exports for the 12 months ending March, 1935, amounted to \$3,567,258.

Trinidad will launch new public works projects to care for unemployed.

Significance Of Jubilee

Kingdom Honors King Because He Is Faithful To Duty

Behind any voluntary outpouring of the best human emotions, the emotional manifestations in which the race delights, there is generally some sound practical instinct giving the display significance. So it is with the jubilee demonstrations for the King and Queen of Great Britain.

"The strength which accrues to British government from having at its head one who represents the people as a whole, and not any particular party, class or policy, cannot be questioned. It is a strength which repulses lack, and which has helped to bring dictators in those countries which have launched republics without first building strong traditions of self-government. Perhaps the King is great in just this measure as he can subordinate himself to the Crown. That symbol should more to bind than to enslave the personality of him who wears it temporarily. And it is this which makes George VI. a symbol of self-renewal that his people do him such honor, as a people who represent the people of their political machinery."

Italy's Book Hospital

Damage Done To Precious Volumes Will Be Repaired

Italy's new national hospital for books is to have its headquarters in the Abbey of Grotta Ferrata, near Rome.

All the resources of modern science, from chemical analysis to ultra violet rays, are being used by the experience of the abbey, which has been identified for many hundreds of years with the preservation of precious volumes.

The institute will have three departments. The first, concerned with physics and biology, will diagnose the damage done by insects, damp and fire. In the second department, books will be photographed and subjected to a microscopic and chemical examination while in a restoration department, the books will be restored as far as possible to their original form and clarity.

Patent—"How can I ever repay you for your kindness to me?" Doctor—"By cheque, postal order, or cash."

A cloud burst generally comes six or more inches of rainfall and at the rate of 10 or more inches per hour.

The SHAPSHOT GURU

You Don't Necessarily Need An Expensive Camera

Trans-Canada Highway

Bank of England Overstated

Surplus Clerks Choose Job in Preference To Home

"The Old Lady in Threadneedle Street"—the Bank of England—decried in the past the situation of the old lady who lived in a shoe and had so many children she didn't know what to do with them. In the case of the "children" are surplus clerks who have refused financial inducements to leave their jobs and seek a livelihood elsewhere.

During the war years the Bank of England did not take on additional employees, but between 1919 and 1927 about 500 "temporary" clerks were engaged because of the vast amount of accumulated work, together with loans and conversion operations and the large increase in the bank's dealings with the continent of Europe.

The additional men were hired without examinations and without having served any banking apprenticeship. Now the work to be done has decreased, and various departments, housed elsewhere for several years while the bank building was being reconstructed, are returning to headquarters, with the result that fewer employees are required.

The bank authorities therefore have offered to the "temporary" employees retirement gratuities ranging up to \$10,000 each, according to the position held and salary received, or the alternative of a life pension of a maximum of \$10 weekly. Only a few men have accepted the first proposal, and thus far only seventy-five have agreed to retire on a pension.

Since acceptance of either offer is entirely voluntary, the bank is retaining those who wish to keep their jobs, though they have been reminded that they have little or no chance of advancement. However, since many of them are married, they are likely to be glad to leave. They prefer the certainty of their present salaries, together with the automatic pension they will have upon reaching the age limit, to an uncertain prospect of other jobs, even with the financial inducement offered.

Palatial Subway Stations

Moscow's handsome new subway was opened to the public with much publicity heralding the use as the most beautiful underground railway in the world. The subway stations are like palaces, with checkerboard paving, marble columns and pink ceilings. Seven miles of the line have been completed. Work starts immediately on an additional twelve miles.

What the world needs is peace pacts that pack perfect peace.

Russian Scientists Planning To Break Record In Exploring The Depths Of The Ocean

Potatoes As Stock Feed

True Value Is Not Fully Recognized In Canada

When the true value of potatoes as feed for livestock and poultry is realized, much larger quantities than at present employed will be used. With high prices for stock and poultry feeds and a surplus of potatoes in Eastern Canada, stock raisers near the plentiful supplies of potatoes have a good opportunity to reduce their feed bills by feeding potatoes. Other countries make much use of potatoes as stock feed. In Germany, for instance, only 30 per cent of the total potato crop is used for table purposes, and approximately 40 per cent for stock feed. On the other hand, in Canada 94.5 per cent of the crop finds its way into the table and only about 11 per cent for stock feeding. Stock raisers, says the Agricultural Situation and Outlook, recently issued by the Dominion Department of Agriculture and the Department of Trade and Commerce, would be well advised to inform themselves on the proper methods to ensure the best results. In brief, potatoes are in fact "watered" carbohydrate concentrates. They may be used, therefore, as a substitute for barley and corn, as in the rations of pigs, in which case it is important to bear in mind that four pounds of potato is equal to one pound of cereal meal.

For Better Relations

Urges Reciprocal Tariff To Be Applied To North America

Establishment of closer and better relations between United States and Canada was advocated by H. Ford L. MacNider, former minister to Canada, and former national commander of the American Legion.

The people of Canada, MacNider told members of the Minneapolis Junior Association of Commerce, in Minneapolis at their annual meeting, are ready to meet any advances that are made despite the fact, that although unintentionally, they have been treated badly in the past. MacNider made it plain that he was not making a political speech but he said he felt a reciprocal tariff to some extent at least ought to be applied to North America.

As an example of past developments injurious to Canada, MacNider pointed to the large-scale destruction of property and products of the United States, he said the tariff aimed against Mexico, which had the effect of reducing the cattle business in western Canada.

Aimed Criminal Code

May Abolish Suspended Sentences For Persons Driving Cars

Suspended sentences for persons convicted of driving motor cars while intoxicated would be abolished under an amendment to the Criminal Code introduced in the House of Commons by Hon. Hugh Gibson, minister of justice.

The change would make it impossible for magistrates to suspend sentence in those cases. The code amendments include a number of clauses aimed at unfair practices in merchandising, based on the report of the price spreads commission. Mr. Gibson said there might be some doubt about the constitutionality of these clauses, which would require heavy penalties.

Law Of Offence

Husky Dogs Attack And Kill Anyone Who Falls

Dog drivers, veterans of the snowy trails, who ride while after hawking dogs recommended for the three husky dogs that attacked and killed a six-year-old boy at the Fox, Man. To the members it meant confirmation of the trail driver's fear that huskies no matter how friendly, attack and kill man, woman or child who falls. It is the law of the dog pack and in the maleness of the north the wolf strain predominates. Those who follow the northern trail, however, the law must have. To huskies, who often eat their own kind on the trail, that means "fair game."

It is estimated that about nine million birds annually rear their young in the isolated refuge of the Pribilof Islands in Bering Sea.

This year marks the highest point reached in Soviet science and exploration in the 17 years of the country's existence.

A new type bathysphere now is under construction in a Leningrad scientific laboratory, which the Soviets hope to break the depth record set up by Dr. William Beebe. This will be the first time that the Soviet has attempted to explore the depths of the ocean, but their success in the bathysphere has made them seek new fields.

In the Soviet campaign of "Conquer the Arctic for the Soviet" 776 ships will sail the Arctic waters this summer, establishing regular routes, prospecting for the Arctic fur trade, and filling in the white, unexplored regions on the map.

One ship, the ice-breaker "Belov," will make an attempt to explore the stretches between 81 and 83 degrees northern latitude where only two ships have been in the past. It is believed that considerable stretches of clear water may be found in this region.

The realm of aviation new planes are being built and new air lines opened. Special "freeze-proof" planes, insulated against all cold, have been built for the Arctic fur trade. A trunk line using this type of plane will be opened during the year running all the way from west to east over the top of the continent, from Murmansk to the Bering Sea.

Two new stratosphere balloons are being built for flight into the upper layers of the atmosphere this summer. They will have all the safety features possible to safeguard the lives of the pilots.

Future Plane Examined

Advisory Committee For Aeronautics Explain Details Of Year's Work

The skeleton of the aeroplane of 1940 was examined in detail at Langley Field, Va., by 250 aircraft engineers, designers and government officials.

Members of the research staff of the national advisory committee for aeronautics explained in detail the results of their work during the past year in boundary layer theory, the airflow development of more efficient compressors, jet engines, and the decreasing of noise.

The new popular price monoplane of the bureau of air commerce was demonstrated in the large-scale wind tunnel, marking its first appearance. The machine has a small cabin, pusher type propeller, front cabin, and a very low wing, and dual vertical and horizontal control fins.

Large Shipment Of Bees

Over 700 Packages From California For Alberta Apiaries

Millions of bees under the care of Prof. Richard Smith of the University of California arrived at Lethbridge on May 5th to be distributed later to apiaries in Southern Alberta. The 777 packages shipped by beekeepers in Southern California was the largest consignment ever received in the West. Prof. Richard stated the bees en route and was well studied with their condition on arrival in Lethbridge. S. O. Hillier, Alberta apiarist, met Professor Eckert at Spokane and travelled with him.

A New Scotch Story

Sir Harry Lauder was the subject of a new Scotch story by George McGowan, official of a Memphis, Tenn., firm that furnished flooring for the singing school at the University of Glasgow. McGowan said he took pictures of the rooms, with their floors, said McGowan on his arrival in New York. "We no asked Sir Harry Lauder, but we were very interested about it. He said we could take the pictures—and it would only cost us a guinea a room. Yes, we paid."

New Island Appears

A small island has appeared in the Dardanelles near Gallipoli, between Chios and the mainland. It is about 1,050 feet long and 200 feet wide, formed of sand, pebbles and seaweed-covered rocks. At the same time with the appearance of the island, the coast line has been found to have deep pits. Geological experts attribute the appearance of the island to the pressure of the water on the sea floor of the Dardanelles.

Isn't it a pity that only those out of office know how to run a nation?

THE TIME NOT TO QUIT

It has been said that a pessimist is one who finds a difficulty in every opportunity and an optimist is one who finds an opportunity in every difficulty.

There is a great deal in this "darkest hour before the dawn" talk.

When everything is breaking badly—when all the hard luck seems to be coming at once—that is exactly the time not to quit.

The late Sir Henry Thornton used to say that when things got so terribly bad and lady luck seemed to have turned her face forever, either one of two things would happen: The supply of hard luck would run out and good luck take its place or you would come into the class of the underdog and new friends would turn up from all directions to root for you.

"Let him who will tread easy ways and have his burdens light."

But as for me I'd rather know the struggle and the fight.

I'd rather risk with failure in the battle's noise and heat.

Than live a sheltered life and never venture with defeat.

I would not choose to be endowed and freed from want and fear.

To have no goal to try and reach, no purpose year by year.

To live and laugh and sleep and dine. God keep me safe from this.

And let me shout at targets far—yes, even though I miss!"

MAN, THE DESPOILER

Wherever civilized man has settled he has set about a policy of destruction—carelessly, thoughtlessly and wantonly wasting the beauties of nature.

Millions of acres of splendid forests have been laid waste and the world is daily in need of cheap lumber. Only in a few countries have adequate policies of reforestation been adopted.

Where are the buffalo, whose countless herds once shook the prairies of the western North America with their ponderous tread?

Where are the passenger pigeons? The migratory flocks of these birds once darkened the sun with their multitude.

Sea and lake fisheries have been ravished, land has been abused until almost useless, vast resources of natural gas and oil have been criminally wasted, bird and beast game life have been almost annihilated.

There must be a stop somewhere or the earth will be depleted of its resources and the abundance of animal life will completely disappear.

Man must awake to the importance of preserving the beauties Nature has provided. Otherwise he is liable to go hungry some day.

FRANCE'S BIG PROBLEM

France is having one heck of a time with her internal affairs these days. Although possessed of over four billion dollars in gold she finds her budget unbalanced and her people suffering from poor business. Unemployment is increasing.

France devalued her monetary standard, the franc, from 20c to around 16c after the war. In so doing she wiped out four-fifths of her indebtedness, at the expense of holders of francs. The experience was a bitter one for many thrifty French and these people do not want to endure a similar experience again. Once in a lifetime is enough.

But all the other nations have devalued their money, except for little Holland and Switzerland, and this makes it difficult for the French to compete. Many French people believe that their country will sooner or later revalue the franc once again and, to prevent losses, they are buying gold with their paper money and caching it. It is this activity that is now disturbing the varied assortment of French government which are following one another.

The system of government in vogue in France is somewhat different from any other country's. The president has only nominal power and parliament is supreme. But parliament is made up of a number of groups with none possessing control. This makes for chaos. A firm hand at the head of the state is badly needed, but the chamber of deputies cannot agree to give any one of their number sufficient power.

IMPROVEMENT SLOW IN COMING

Of course the throng of young jobless men who are crossing Canada from west to east to impress the federal government with their plight may not obtain much material benefit from their exploit.

The government knows their condition. It also knows there are many, many thousands more in similar shape. And there are also thousands of older men with no work and no prospect of getting any.

Schemes are advanced, theories propounded, and the days, weeks, months and years pass and hopes grow unrealized. It is easy to condemn the young men for leaving camps where they obtained food, clothing and shelter and maybe a little cash, but the terrible monotony and hopelessness of such an existence is enough to drive these men into almost any sort of a rash adventure.

Also it is not easy to provide a solution for the problem. In fact all the leaders of every nation in the world have been struggling to find a way out for several years now. Save for a few partial successes, all efforts have been rather fruitless.

In the meantime much trouble and grief have developed and a great deal of money spent without a great deal of discernible improvement.

EXAMINATION TIME

Examination time for school students will soon be here. With an awful presentiment of evil amongst most students, the issue of the year is faced.

Many students wonder what good are exams at all, with their catch questions which, through some misfortune the diligent reviewer has overlooked. But no other competent system of fair trial of what work a student has done during the year has been developed to take the place of the June examinations.

So with palpitating heart and feverish brow the battalions of school students face the ordeal.

The most fortunate students are those who still have a few school years ahead of them. Those who pass the leaving exams have a new set of problems to face—the principal one being getting a start in life.

Ten Minutes with the Scotch Philosopher

Dutifully confronted with big, bare, brown spaces which not long ago displayed a wealth of green wheat, and getting ready to battle the hoppers now hatching out, the old farmer is wondering just how far round the corner "next year" is. We did hope it would come quick enough to enable us to have a pair of suspenders, but with a little blunder twine and haywire on hand, we'll be spared looking like a doughboiler lost from the annual parade. Meanwhile we'll sell all our creditors that the antics of funny Alberta have got so danged peculiar, like a balky horse, we don't know whether we are coming or going.

While praising a wealthy member of his congregation for his benevolent deeds, the pastor of a great metropolitan church said the man's fortune came into being largely through meditation and prayer.

But without being the least bit irreverent or even doubtful of the parson's sincerity, we suggest that the accumulation of fifty million came about in a less desirable manner.

Ten years ago the parson's statement wouldn't have been challenged, but since that time the results of many investigations have convinced all that the unequal distribution of wealth is not brought about by the will of God but through man's greed and the greed of those who can use.

Thus today we have a few men, mostly old and exceedingly wealthy, reaching out to claim tribute, in some cases from the men and women of farm, hamlet and city.

Surely a kind God does not smile down on such base-born iniquity.

At a meeting which we attended late in April the proceedings were opened with a hymn instead of "O Canada." But while we can respect the opinion of others who see fit to carry on their business in this manner, we are bound to assert that the old-fashioned way is best. "O Canada" we have a patriotic song that is not surpassed by any other in this wide world.

Offending no one by its modest language, and enriched by a melody suited for young and old, it is worth while handing down to future generations of Canadians.

Therefore, when we meet at public gatherings, let us all stand up and sing it in a joyful way.

Owing to the difficulties experienced by a large flock master with his lamb crop, many young ladies in the vicinity have acquired a number of these lovable creatures with the following result.

The girls who had planned a dance to be advertised as the Hopper Ball have decided that a more appropriate title would be the Sheep Herd-er's Parade.

Yet some foolish men see the ladies are not progressive.

In a recent issue of The Mail the editors enthusiastically proclaimed that tea "cannot be heated as a human drink." But when these ladies reach the uppermost degree of worldly wisdom they will realize that the generous juices of Bonnie Scotland has a joyful influence possessed by no other liquid refreshment. At picnics, social gatherings and cricket matches tea no doubt makes life bearable, but give a man who is feeling and a betty Dock an' Doris and in five minutes he won't care whether the world goes all by itself or on the axle of a 1910 Ford.

SCHOOL GIRL BONERS

Who was the famous maid who saved France? Mademoiselle from Armentieres.

Corruption is what you call the people in a church.

Nitrogen is the kind of air you breathe at night.

Punctuating means being on time.

A sentence is something that cures sin.

Grammar is the mother of your merits.

A myth is a unmarried lady.

A corsair is a man who makes corsets.

A captain is an officer in the army.

The jugular vein is what you talk in when you are joking.

Banish is the sort of salt women use in their baths.

A niche is a tickling feeling that makes you want to keep scratching.

PATRICIA NOTES

(Too late for last week)

PATRICIA, June 8.—Irrigation water is in the ditches once more since the spillway which washed out has been repaired.

The Patricia baseball team received their first setback last Sunday at Duchess at the hands of the Duchess Wambats. The Patricia team worked their way to Duchess through mudholes, lifted 4-ton trucks out of the ditches, shoved five cars for half a mile, so they were pretty well staked when they reached their destination.

Duchess proved the best mud-horses so naturally they won out. Bob Lindsay, the local manager, broke a brand new pair of suspenders on the trip.

Sunday the team journey to Tilley where they will clash with the Tilley Trollers.

Have you received your chain letter yet?

Stanley Cunningham was a Calgary visitor over the week-end.

Budley Ward of Calgary was a visitor in the district Thursday.

Ducks are more plentiful than they have been for several years.

Swelling is practically all finished, except suits for green feed.

The Girl Guides held a very successful dance Friday night.

Locally, folks, news is scarce as jam sandwiches at a Jewish picnic down this corner.

SUMMER COURSES FOR TEACHERS

To provide opportunity for teachers of the province to obtain instruction in manual arts and shop subjects that they may be in a position to meet such demands from their classrooms as arise for this class of work, a summer teacher's course of five weeks is being promoted by the provincial technical school at Calgary.

It is announced by Hon. Perry Baker, minister of education. This course commences on July 2nd, and closes August 7th, and instruction will be given in the following subjects: Woodworking, machine shop and forging, autos, electricity, mechanical drafting, and sewing and cooking for girls. The course to be provided at a nominal fee. The technical institute will also conduct an art school at Banff from August 2 to 23, under direction of A. C. Leighton, B.A., well known artist of Calgary, whose pictures have appeared in the Royal Academy in London for the past 15 years.

London's Daily Herald which five years ago was doddering along with a slim quarter of a million circulation now holds the record as the world's most read daily with circulation figures in excess of two million copies per day. From being a dimwit paper for the masses the Herald, founded in 1912 by Laborite George Lansbury, cleared over a million and a half dollars profits for its owners last year.

YOUNG BILL REJOICES IN THE FIRST STORM OF THE SEASON

By TIM LONGBOOTHAM

Hear the raindrops sounding as they hit the roof, "Next year" has arrived at last—hearken to the proof! We'll have lots o' parties, plenty fun again. Golly! ain't it lovely! Keep on rainin', rain!

Pasture for the horses, garden stuff to eat, Dad will have a bumper crop—ain't it hard to beat? Sir will get her banjo, Jim his nanny goat, Pete and Joe a rad-i-o—me a swell new coat.

Grandad's at the doorway—see the old boy grin! He's been helping mother chase the poultry in. Grandma's singing softly—Gee! but I am glad Seein' them so happy 'stead of tired and sad.

Now the roof is leaking—reels the good old shack! Loud the wind is howlin', thunders roar an' crack! Hear the dishes rattlin'—boy! but ain't it grand! When the first big soaker strikes the prairie land!

CHANCELLOR

CHANCELLOR, June 10.—Mr. and Mrs. J. M. Whistley were in Calgary to see the Scottish football game. The regular monthly meeting of the Women's Institute was held at the home of Mrs. George Sprout on Thursday afternoon. There were 19 members and visitors present. Mrs. H. P. Ponke gave a paper on "Education and Better Schools." Mrs. Marjorie Grant gave an interesting discussion and demonstration on domestic science. At the close of the meeting the hostess served a dainty luncheon. The July meeting will be held at the home of Mrs. Harry Chumney.

On Friday night the delegates of the Social Credit groups of the Bow Valley constituency held a meeting at the Memorial hall in Chancery. The speakers were: Mr. Mueller, L. P. Schouling and Mr. Blake, all of Huesar, and Mr. Kane of Brooks. A very large audience was present. A program was also arranged which included a duet by Mrs. N. Hansen and S. McAllister; piano solo by Mrs. H. P. Ponke and a reading by Miss Morrison. At the close of the meeting the ladies of the Chancellor Social Credit group served lunch, this proceeds to go to the treasury. Marie Cronberg of Huesar is at present visiting with Mrs. M. H. Muir.

Violet McConnel of Huesar was in Chancery on Saturday. Visitors to Calgary last week were Mr. and Mrs. Charles Jorgensen, Mr. and Mrs. N. Hansen, G. C. Phillips and Perry Barker.

Rev. Aldridge of Oden preached here on Sunday morning at the Memorial hall. He will hold his next service here on July 11. Mr. and Mrs. A. E. Hobbs entertained at dinner on Sunday, and had as their guests: Mr. and Mrs. W. Hanes and Billy of Stobart; Mrs. Neils Jensen of Standard, and Mr. Mrs. N. Hansen.

MACHINES DISPLACE BANK EMPLOYEES

A thousand employees of the Bank of England have recently been displaced by machinery. That sounds strange. But one often reads of factory and shop-workers being laid off because of new inventions in the machine world—how it has come to bankers. But the bank of England, in making the change did not just turn its old employees out on the streets without some provision for the future—every one of those laid off were given the choice of accepting a life pension of £2 per week, or a lump sum of £2,000.

These new machines are accounting mechanisms, each of which will do the work of sixty ledger-keepers, and each machine can be operated by one girl—Drumheller Mail.

BETTER N A JOB

A negro met an acquaintance of his, also colored, on the street one day, and was surprised to see that his friend had on a new suit, new hat, new shoes and other evidences of prosperity.

"Tidy, boy," said he, "how come you dressed up dis way? You got a job?"

"Tee got somethin' better'n a job," replied the other. "Tee got a profession—Tee's a orator."

"Don't you know?" replied the respondent in surprise. "Well, I'll tell you what a orator is. If you walk up to a ordinary nigger and ask him how much was two and two he'd say 'four', but, if you was to ask one of us orators how much was two and two, we'd say, 'When in de course of human events it becomes necessary to take de sum of de second de nomination and add it to de deffer to. I say unto you and I says it without fear of successful contradiction, dat de result will invariably be four.' Dat's a orator."

Be sure and come to the Bassano July 1st Celebration!

CROWFOOT

CROWFOOT, June 11.—The backwater was the scene of a double-header softball game last Sunday—Lathams defeated Crowfoot 15-10 in the first game and the Crowfoot Creek team defeated Makepeace by one score in the second game.

Anyone wanting greenhouse-potatoes can get it at the A.P. elevator at Makepeace now.

Congratulations to Eleanor Hefle-bower who successfully passed all her examinations at Edmonton.

Miss Holtan of Jenner spent last week at the home of Mr. and Mrs. P. Holtan.

A number of friends spent a pleasant evening at the home of Mr. and Mrs. D. C. Portney last Saturday, when they surprised them. The occasion was Mr. and Mrs. Portney's silver wedding anniversary. Among the guests were Mr. and Mrs. Royer, the Blases, Clara, Hanna and Marie Chamberlain and Robert and Paul Chamberlain of Glem. Mr. and Mrs. Portney received several beautiful and useful gifts of silver.

Gladys and Alice Portney spent the week-end at their home near Makepeace.

Word has been received that Miss Thelma Reynolds of Los Angeles, California, formerly of the Crowfoot district, is in hospital there with influenza paralysis. Her many friends wish her a speedy recovery.

IL DUCE HAS A "SHINER"

As we note in the news that Premier Mussolini has appeared in his office with a fine, lustrous black eye, commonly known to the vulgar as a "shiner."

The Duce explained carefully to his staff that he got it falling off a horse. And nobody smiled.

We have never quite fully realized before the great advantage of being a dictator.

It is nothing very much to command armies. It would even get tiresome running a country.

But when a fellow can get up a car like that about a black eye and cry away with it, now "ain't that something?"

She frowned on him and called him Mr. Because, in fun, he merely kr.

And then, in spite.

The naughty Mr. Pr. sr.

Bright Stories about Wine
SPECIAL GRAPES

It is true that a wine can be made from any grape. In the same sense it is true that one could make a race between a team of horses which had spent the best part of their lives in the plow. If the grape is to be regarded merely as an agent of intoxication, then the end can be gained with potatoes, dandelions or any other vegetable matter that ferments. But the truth is that comparatively few kinds of grape are used by reputable vintners to make wine. This is a fact not generally known, or perhaps the public is interested not so much in the reasons as the results. Nevertheless we think it appropriate enough as part of an educational campaign to note some of the differences in the various grapes.

When one says that all that is required of a grape is that it should be palatable or readily converted into wine, he speaks with a generality and positiveness that growers and wine-makers might well envy. Most of our own wines come from the Concord grape, but there are scores of grapes which are cultivated, each having one or perhaps more than one desirable quality. For instance, the Catawba grape has several advantages except that of early maturity, and it is restricted to an extremely narrow district. The Elvira, a white wine grape, has a skin that berries easily, and therefore it is a bad shipper.

The Delaware is a meagre yielder and is not vigorous. The Norton matures too late for our Canadian climate and is difficult to propagate. Other varieties have what is called a foxy flavor. This is characteristic of the Concord, of course, but some connoisseurs admire it. There is a demand, however, among experts for a grape that lacks this characteristic odor, and experiments to this end are going forward. But undoubtedly the science of viniculture will overcome this obstacle, if indeed it is an obstacle. In some of our wines this peculiar bouquet is absent.

A LITTLE COMPANY GROWN BIG

IMPERIAL OIL was a little Company in 1888. There was then only a handful of employees. A dozen or so products were the Company's stock in trade.

Today nearly 18,000 Canadian men and women are engaged in making and selling 714 different Imperial Oil Products. So, counting their families, there are about 90,000 people directly dependent for livelihood on this Company and its operations. 90,000 is a lot of Canadians.

Imperial Oil's growth depended upon more than growth in population and demand. Fair dealing, honest value and the ability to meet new needs with

new products and new services all played their part. Of course, a loyal, capable staff was indispensable. Such a staff was built up by fair and considerate treatment. Good wages, sickness and death benefits, retirement pensions, group insurance, industrial councils—these are some of the measures by which the Company has recognized its responsibility to the men and women in its employ.

These men and women have recognized in turn their responsibility to the Company. By loyal, whole-hearted service they have helped it to make better products at lower cost and thus become "a big company."

SYNOPSIS

Nancy Nelson is a sub-deb, a girl, irresponsible girl in nonsense, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market, crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of life. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

Now Go On With The Story

CHAPTER III.—Continued

There were also plans to make for Aunt Judy, who was said to be a fortnight. The air was filled with a subtle confusion and unrest. And then one late afternoon, returning from a tea with the message, she turned the girl to go, Nancy said a telegram on the hall table. It was addressed to Jack, but she grasped the envelope eagerly, her heart pounding as she tore it open. A dim hope that Cousin Columbine would wet-kissed, the whole idea, swept through her, but the message, eccentric and to the point, read briefly:

YOUR LETTER SHOWS YOU TO BE A TRUE NELSON SON. GET OUT OF RANCH. THINKING MILES FROM HERE STOP BOBBY TO HEAR OF YOUR FATHER'S FIVEHUNDRED DOLLAR WEDDING. WILL SEND CHECK TO COVER EXPENSE OF TRIP FOR BOTH OF YOU. STOP. ADVISE COME AS SOON AS POSSIBLE.—COLUMBINE NELSON.

Nancy read this twice, her hands gripping the paper tensely. She was still staring at what seemed an irrevocable sentence at hard labor, when her father entered the room so quietly that she had no chance to conceal the tell-tale yellow message. He asked, a touch of alarm in his voice: "What's happened?"

She glanced up, forcing a smile of reassurance. "Nothing to worry about. It's a telegram for Jack. No bad news, Daddy."

"Let's see, daughter." He stretched out his hand, but Nancy thrust the paper into her coat pocket. "No," she said, "you'll have to wait till Jack comes home and tells you. I look Aunt Judy after I go to the Spars" on some last errand."

She moved away, his eyes following her, puzzled. "What's who's it from, Nancy?" the girl laughed.

"You're just as curious as an old woman, Dad; but I promised not to tell, and I'm not going to. You won't have long to wait. It's almost dinner time. Here's Aunt Louise."

She darted off before he could question any further, but as she reached her room a voice recalled her, and Jack, who had come in close on his aunt's heels, was with the stairs.

"Hi there! Dad says I've got a telegram. What luck?"

Nancy held it out, watching him read it. The boy drew a deep breath of relief.

"Good! That's settled then. It's not 'if' Dad objects, or Edger."

She couldn't keep the shame he got out of her voice, and catching it up

when your daughter comes to womanhood

Most girls in their teens need a reliable and regular. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Sold at all good drug stores.

Lydia E. Pinkham's Vegetable Compound

through, the hard shelling; and I think they're afraid. But how come, dear? You might be sick."

There followed a silence before Mother said: "You're not in favor of this move—yet; but I'll have to admit that according to Doctor Strong Jack's more likely to be sick if he stays in school." She went on to tell them of the doctor's chance remark, and added: "I thought at the time that he was over-cautious. Jack seemed so well; but the boy has grown appallingly, and I dare say life in the open air would build him up if he didn't have to work too hard."

Aunt Judith sank back and stared at her sister.

"I'll never have expected that from you, Margaret. But if you ask me, Nancy will expire of loneliness in about one month. What will she do with no young friends to run around with, and Jack three miles off on a ranch?"

The boy laughed. "You talk as if the population of Pine Ridge was made up of inhabitants over seventy. Aunt Judy! Didn't Cousin Columbine mention a postmaster's daughter?"

"Oh, yes, here!" He followed her into the room, closed the door, and didn't mean anything, Sir, honest. I was just afraid they'd see how much you hate to go, and put their feet down. Cousin now. Let's get it over before dinner."

The family's rebellion was very nearly unavailing.

Said Dad: "If you must have jobs, both of you, surely we can find something nearer home."

Said Aunt Louise: "You're too late. I've already expected a real lark, but—homeless! Well, I warn you kids that homelessness is no light matter."

"It might as well be," observed his father. "I remember spending a summer at my grandmother's farm when I was ten. I expected a real lark, but—homeless! Well, I warn you kids that homelessness is no light matter."

"I guess you'll be riding horseback all day long," spoke up the little brother enviously. "I wouldn't think of being homeless. Dad has a horse. Daddy. Will you wear a four-gal hat, Jack? And leather chaps with fringe all down your legs like they wear in the movies? Gee! I wish I was going too."

"We don't know yet whether anybody's going sunny," returned his father. "But Cousin Columbine's sister, Margaret? Let's make sure what is expected of our Nancy."

There ensued a fruitless search for the long expected Mother said: "I remember those duties pretty well. Nancy was to take the 'man's' every morning, get supper Thursday, and read the paper aloud, get to bed by nine-thirty."

"And abstain from the boy friend," chuckled Jack. "I admit that is a big order for Nancy."

"A lot you know if you think 'pumpkins' replied his sister. "Would any fellow as good as himself stay in a back-woods place like that? And I've no interest in the other sort, so Cousin Columbine needn't fuss. She's just a young man callers she mentioned. And you needn't either." Nancy told her mother with a smile.

For Baby's Bath

More than that of any other member of the family, baby's tender, delicate skin needs the soft, soothing oils in Baby's Own Soap make it especially suitable for babies, and its clinging fragrance reminds one of the roses of France which help to inspire it.

"It's hot for you and baby!" 22-28

old lady. I bet Nancy wouldn't be dead in one, or Mother either. Come on. Let's eat."

Dad was still smiling as they moved towards the dining room; but once seated, he looked across at Mother and his eyes clouded. Both were thinking that this would be the last well-served dinner in the old home. Two maids were leaving next day; and only the cook was to remain until the city house was closed.

Remembering this fact, Aunt Judy had stamped it a day on her way home, and a dozen jingling medals gaily from the centre of the table. Aunt Louise, eying them with disapproval, started to say something about "fodder extravagance," and then held her tongue. After all, she thought with extraordinary tact, if Judy wanted to spend money for something perishable in these hard times, it was her own business.

So Judith Hale's "extravagance" (the last she was to indulge in for many months), remained unexpressed, added a note of cheer to that dinner table, as she meant it to; yet as the moments passed, Mother kept thinking sadly of how soon they might all be scattered separated. She, Dad, and the little boy at Edgemoor. Judith in Kansas—Louise alone in a city boarding house—Jack and Nancy.

This last she refused to face just then, and said when Jack resumed the subject: "Oh, let's forget it, dear, while we eat dinner."

"But we've got to decide, Mother," he persisted with impatience. "I dare say Cousin Columbine's expecting a telegram to-night."

"Never mind," put in his father. "Let's hold the old lady to wait for a message until tomorrow. But we'll decide the question this evening. Jack, I promise you. And all, it's as easy as face things now as later."

(To Be Continued)

THE RHYMING OPTIMIST

By Aline Michaelis

NOT TOO NEAR

Let me not be too near
The life that Jack is near,
Least much detail obscure
The plan, the purpose clear,
Which in their living hours,
Through bright and sunless hours,
The truth I long to learn,
How clear my loved ones' lives,
How heavy they are, how vast,
How strong for sacrifice.

"I guess you'll be riding horseback all day long," spoke up the little brother enviously. "I wouldn't think of being homeless. Dad has a horse. Daddy. Will you wear a four-gal hat, Jack? And leather chaps with fringe all down your legs like they wear in the movies? Gee! I wish I was going too."

A Mobile Army

Germany Plans For Swift Movement
Of Troops

Authoritative sources disclosed in Berlin that the German military command plans a highly mobile infantry and artillery which will enable the army to move at 80 miles an hour "over almost anything except woods."

Two motor vehicles for every four infantrymen is the new army's ratio to obtain an unprecedented flexibility and speed.

Open automobiles carrying powerful guns will be used over most roads, sturdy trucks with a capacity of 20 men will be employed on congested highways and near the front, and tanks or armored cars are planned for front line service.

Light field pieces, splendid highways strategically extending to the frontiers, commissariat equipment, motor vehicles, and tanks are included in the array of improvements that a foreign expert described as "leaving nothing, not even the weather, to chance or the lack of an enemy."

The underlying principle, he said, "is that the war will be a fast one, requiring rapid movement of men and arms to any number of fronts while swift airplanes sweep up enemy cities to destroy communities and morale, to keep vital places away, and to conduct reconnaissance."

Tragedy For The Drummer

Slung Broke During Change Of Guards At Windsor Castle

Presumably it is safe to say that there are few who have not seen Bateman's cartoon of the Guardsman Who Dropped His Rifle.

He should draw a companion piece—the Drummer Who Dropped His Drum.

The other day they were changing the guard at Windsor Castle. It was, of course, when the King was in residence, there, just before the Jubilee celebrations. The public, it is estimated, there were in excess of 100,000 who turned out to see the grand sight flanked by the ceremony.

With the splendid bearing for which they are noted the Grenadier Guards got under way. They were headed by their band. In the front rank of the drums marched the unfortunate victim of the tragedy.

The sling which carried his drum broke. The instrument hung and started along the ground, rolling along beside the marching men. Most mortifying.

It says much for the discipline of the standing army that not a man broke step, nor even looked toward the offending instrument. Not even the drummer, he just kept marching along.

A civilian picked up the drum and returned it.

Has Place In History

Plaque Unveiled At Base Of Minors' Tree In Natal

In a quiet garden of a residence in Maritzburg, Natal, a company of distinguished people honored a flat, circular plaque, under the spreading branches of which grew a W. I. Pretorius, members of the Volksraad, and burghers of the Natal Republic decided on July 5, 1912, to accept British rule. The 1912 group unveiled a plaque at the base of the tree bearing of its place in history.

From 38 to 108 hours daily are shed normally by young men and women between the ages of 18 and 20, between the ages of 50 and 60, this number exceeds 120 hours daily.

Father: "But if you marry my daughter, what will you live on?"

"I don't know," replied the girl. "I shall remain here as your housekeeper, and I'll become your secretary."

1,000 PAIRS
OF MONARCH DEBUTANTE
SILK STOCKINGS
Free!

Go to your druggist or department store and buy RIT dye (any color, 15¢-1 for 25¢). Then mix it in a statement of 50 cents or less, why you RIT-1,000 pairs of Monarch Debutante full-length stockings—free! Give us your name, address, and a 10-cent stamp to be sent to 1,000 pairs, from which can be produced over 1,000 pairs of silk stockings.

FAST COLORS WITHOUT RITING! Only RIT offers this advantage! RIT is the modern tint or dye—superior to ordinary "surface dyes" because it contains a special ingredient that makes the color last in deeper, for longer and longer.

HOW TO WIN 1. Write a short statement (under 50 words) on why you prefer RIT dye and send it together with an empty RIT package (or reasonable facsimile) to: RIT dye and stockings, to John A. Huston Co. Ltd., 42 Cecil St., Toronto.

Send a money order with; contest closes midnight June 29, 1913.

A 1,000 pairs will be awarded on the decision of the judges, which will be final. Whether you win or lose, you will receive a 10-cent stamp to be sent to 1,000 pairs, from which can be produced over 1,000 pairs of silk stockings.

Little Helps For This Week

"If we hope for what we see not, then do we with patience wait for it." Romans 8:25.

"One day is with the Lord as a thousand years; as one day is a thousand years as one day." 2 Peter 3:8.

Lord who Thy thousand years doth wait.

"The day is with the Lord as a thousand years; as one day is a thousand years as one day." 2 Peter 3:8.

Lord who Thy thousand years doth wait.

"The Quality Store"

Local and Personal News

Miss V. McConnel was a visitor in Chancellors on Saturday.

Const. H. Elvin drove to Calgary last week-end for a few days.

Herb Walnes was a business visitor in Calgary on Wednesday.

Stanley Wright, of the R.C.M.P. in Regina, is spending a few days at his home in Basasso.

Ted Gammon of the Royal Bank staff, left on Saturday for two weeks' holiday.

Ralph Harrison, of Mossleigh, is visiting at the home of Mr. and Mrs. L. Whitehorn.

Work on the new drain for the Swimming Pool is progressing rapidly. The alterations will make a big improvement in that the water can be drained quicker and more effectively, providing fresh water all the time.

COUNTS

(Continued from Page 1)
to do some repair work.

Miss K. B. Walsh had as guests on Sunday Mr. and Mrs. Maguire of Gern and Fisher Marrow of Brooks. An outdoor basket social will be held on Friday, June 21, at the Kalkan place, one mile north and one mile west of Coon Lake.

CLUNY NOTES

CLUNY, June 10.—On Friday evening the Westfield schoolhouse was the scene of a delightful shower in honor of Miss Alice Davenport whose marriage to Bill Scott of Duchen took place in Calgary on June 10. Mrs. Goldsmith and Jack Cooper were bride and groom in the mock wedding, after which Miss Davenport was presented with many lovely and useful gifts. The remainder of the evening was spent in dancing.

An event of interest to Cluny people took place in the Knox United Church manse, Calgary, on Monday, June 10, at 3 p.m., when Alice Davenport of Cluny and Bill Scott of Duchen were married, with Dr. Kellogg officiating. They were attended by Miss Mabel Jones and Joe Davenport, the bride's brother, Mr. and Mrs. Scott will reside in Duchen.

Thursday afternoon Mrs. L. P. Hayman entertained at the tea hour in honor of her guest, Mrs. Jacobs of Nighelinge.

On Tuesday afternoon the monthly meeting of the W.A. was held at Mrs. L. Hureau's when members of the clutches W.A. were visitors. A feast prepared by Mrs. W. R. McLean followed the short business meeting. The Brownie hand entertained the ladies with several numbers. Mabel Jones gave a monologue, "Mrs. Clancy's Husband"; Peggy Somerville and Elaine Smith played a piano duet; Helen Beattie sang a reading, "Making An Impression on Grandmother"; the three Blair children, Laverne, Evelyn and Alvin, sang two numbers. The "C" chorus was won by Mrs. Birch of Glendon.

On Saturday the Brownies and their leaders were entertained at the home of Mrs. C. F. Herman. After a picnic lunch, they played ball and ran races and were served with ice cream and cake before leaving for home.

Mr. and Mrs. F. Fairbrother, accompanied by Mrs. Hayman and Barbara, motored to Calgary Sunday evening, returning on Monday.

The program sponsored by the Sunnyside Dramatic society on Friday night was well attended. Mr. J. Wallace was the guest. A little dance followed, music being supplied by the Kraski brothers. The evening was enjoyed by all.

Mr. Robson and Trellis may spend the week-end with Mrs. Thew. The Ladies Aid held their meeting last Tuesday. Considerable business was transacted. The Ladies Aid of June 12 will entertain the Dorothy Ladies Aid on June 12 at the home of Mrs. H. B. Cowan.

Rev. and Mrs. Parker of Wayne visited in the district last week.

Mrs. L. Blumack's dog and baby are visiting her from U.C. Mr. and Mrs. McKinney made a business trip to Calgary last week.

Mabel Peake has accepted the position with Mrs. Leslie Douglas till the end of the school term.

There will be a dance at the Dorothy hall on June 21.

Ann and Marie Anne Simons are visiting with Mr. and Mrs. L. Simons for a few days.

The North Cluny girls softball team are going to play the Oronago girls team on June 16. We wish them luck.

Jim, R. Donaldson is the Basasso representative to the annual Grand lodge meeting being held in Calgary.

The frigatone "canal a half-mile out of town is attracting quite a few winners lately."

J. H. Stiles, local druggist, attended the Alberta Pharmaceutical Association Convention in Calgary the first part of the week.

Sgt. Clarke left on Wednesday night for Regina, the scene for the dispersal of the "On-to-Ottawa" marchers into camps.

William McLaws, registrar of elections, is revising the federal voters' lists at Vauxhall, Bow Island and Winifred this week.

Mr. and Mrs. A. Johnston, of Calgary, are in Basasso for the marriage of Mrs. Johnston's sister, the former Miss Helen Johnston.

The teaching staff and the majority of the pupils of the Basasso school attended the District Inter-scholastic Track Meet in Hussar last Saturday.

The provincial government has placed a ban on the slot and pin-ball machines. After June 29 it will be illegal to own, possess or operate one of these machines.

Ephraim Sheski and Elvira Uerling are taking their motor boat to the Backwater near Crowfoot this Sunday. The craft is 14 feet long, and powered with a four cylinder Maxwell motor.

The dance sponsored by the Basasso Club last Friday, though being poorly attended, was a most enjoyable one. The dance would have been enjoyed by members of the club also, if they had not "gone in the hole."

The coroner's jury sitting on the death of Gilbert Owens in Medicine Hat, found that death came as a result of having been hit by some blunt instrument causing a fracture of the skull and hemorrhage. The case is being investigated further.

Things are reaching a new state of affairs when the publisher of a paper is mistaken for a member of the vast unemployed army that passed last Monday night through Basasso. But such is the case. Sitting in solitude in a local restaurant the other morning, sipping a mug of coffee, he was approached by a rather shabby individual who casually inquired where the rest of the "boys" were. Apparently seeing the surprise in his face, the questioner inquired if he was not one of the "boys" who had been left behind when the freight pulled out. Upon receiving a faint "No" in reply, the latter, with out further ado, turned on his heel and walked out. . . . Oh, well.

TEA TO BE HELD SATURDAY
The Tea and Sale of Home-made candy by the Anglican W. A. will be held this Saturday in Currie and Millroy's Store.

DOROTHY

DOROTHY, June 10.—Many fields of grain are showing green but a good rain is needed.

Many gathered at Dorothy last Wednesday evening to hear the lecture on Social Credit by Dr. W. W. Cross of Hanna, but owing to car trouble he wasn't able to attend.

The program sponsored by the Sunnyside Dramatic society on Friday night was well attended. Mr. J. Wallace was the guest. A little dance followed, music being supplied by the Kraski brothers. The evening was enjoyed by all.

Mr. Robson and Trellis may spend the week-end with Mrs. Thew.

The Ladies Aid held their meeting last Tuesday. Considerable business was transacted. The Ladies Aid of June 12 will entertain the Dorothy Ladies Aid on June 12 at the home of Mrs. H. B. Cowan.

Rev. and Mrs. Parker of Wayne visited in the district last week.

Mrs. L. Blumack's dog and baby are visiting her from U.C. Mr. and Mrs. McKinney made a business trip to Calgary last week.

Mabel Peake has accepted the position with Mrs. Leslie Douglas till the end of the school term.

There will be a dance at the Dorothy hall on June 21.

Ann and Marie Anne Simons are visiting with Mr. and Mrs. L. Simons for a few days.

The North Cluny girls softball team are going to play the Oronago girls team on June 16. We wish them luck.

LOST—In last week's dust storm, one cultural heritage, finder please leave at Herald office. A liberal reward will be paid from the unexpired successful with non-negotiable paper. —The Hanna Herald.
